RE: APPLICATION FOR UX / UI DESIGNER ROLE

Dear Hiring Team,

I am writing to express my strong interest in the UX/UI Designer role. As a product-focused designer with hands-on experience shipping 7+ responsive web platforms and 3 mobile applications across fintech, SaaS, and marketing domains, I specialize in creating intuitive, accessible, and high-converting user experiences.

At Intexm Media, I lead end-to-end design initiatives from user discovery to production handoff. By conducting qualitative user research, journey mapping, and usability testing sessions, I identified critical user friction points and redesigned core transaction funnels, delivering a 22% increase in onboarding conversion. My work is grounded in human-centered design principles, ensuring every interface is backed by user evidence and business objectives.

I also place deep emphasis on scalable design systems and execution speed. In Figma, I architected multi-brand design systems utilizing Auto Layout, design tokens, and reusable component libraries that reduced developer handoff friction by 30% while ensuring WCAG 2.1 AA accessibility standards. Additionally, I leverage modern AI tools (Cursor AI, Antigravity, Claude) alongside rapid prototyping in Framer and Tailwind CSS to validate ideas early and iterate quickly.

Whether collaborating with cross-functional engineering teams or presenting design rationale to stakeholders, I focus on delivering seamless, delightful products that drive tangible results.

You can explore my interactive case studies and UI prototypes on my portfolio at saikiran123.madasu.github.io/portfolio. Thank you for your time and consideration. I would welcome the opportunity to discuss how my design skill set and dedication can bring value to your product team.

Sincerely,

Madasu Sai Kiran

UX / UI DESIGNER
